Time	Student Presenter(s)	Presentation Title	Faculty Mentor(s)
8:30 a.m.	Kevin Yuqi Wang	Direct Conversion of Fibroblasts to Retinal Pigment Epithelium Cells	Guoping Fan
8:50 a.m.	Emily C Lumley Jessica Scott Lindsey Murphy Emily Esch	ER Stress Differentially Activates Pro-Apoptotic Signaling Pathways in Response to Severity of Functional Defect	Jay L Brewster
9:10 a.m.	Kelly C Parks	Using XMLPipeDB to Create a GenMAPP-Compatible Gene Database for the Analysis of DNA Microarray Data for <i>Staphylococcus aureus</i> MRSA252	Kam D Dahlquist John David N Dionisio
9:30 a.m.	Lillian F Zhang Mochtar Pribadi	Delta-Catenin Modulation of Gamma-Secretase Function in Alzheimer's Disease	Hong Wu

PLAZA – Room 189: Biology – Biochemistry and Biophysics

Time	Student Presenter(s)	Presentation Title	Faculty Mentor(s)
8:30 a.m.	Raul Vera Arti Patel	Structural Insights into the Lipid-Bound Conformation of Human Apolipoprotein E CT	Vasanthi Narayanaswami
8:50 a.m.	Zitadel A Perez Amanda Madison	Oxidative DNA-Protein Crosslinking in B-DNA and Quadruplexes	Eric D A Stemp
9:10 a.m.	Lydia Guo	Characterization of the <i>Thermatoga maritima</i> glgC1 D277N ADP Glucose Pyrophosphorylase	Christopher Meyer
9:30 a.m.	John L Waynelovich	Computer Simulation of Crista Structure in Mitochondria	Peter Salamon

PLAZA – Room 190: Biology – Ecology I

Time	Student Presenter(s)	Presentation Title	Faculty Mentor(s)
8:30 a.m.	Jacob Cecala	Flower Preference and Visit Duration of European Honey Bees (<i>Apis mellifera</i>) on Seedless Watermelon (<i>Citrullus lanatus</i>)	Joan Leong
8:50 a.m.	Lea Urpa	Freshwater Incursions as a Switch Mechanism between Alternative Foundation Species: The Physical Context of Adaptive Trade-offs	Carlos Robles
9:10 a.m.	Candy Sonhe Hwang	Spectral Analysis of Color Polymorphism in Pacific Tree Frogs (<i>Pseudacris regilla</i>)	Rodney L Honeycutt
9:30 a.m.	Mary C Zuniga Iolana N Kaneakua Lane H Clemons	Photosynthetic and Water Status Response of a Chaparral Species, <i>Heteromeles arbutifolia</i> , to Post-Fire Light Limitation and Artificial Browsing	Stephen D Davis

Time	Student Presenter(s)	Presentation Title	Faculty Mentor(s)
8:30 a.m.	Shuaili Li	Development of Switchable Olefin Metathesis via Norbornadiene- Quadricyclane Isomerization	Robert H Grubbs
8:50 a.m.	Allen Mok	Towards Parallel Control of Biomolecular Function by Addressable Photocleavable Surfaces of DNA	Philip Lukeman
9:10 a.m.	Teresa Garay	Synthesis of 4-Aminocyclopentenones <i>via</i> Aza-Piancatelli Rearrangements Using Polymer-Bound Metal Catalyst	Gesine Veits
9:30 a.m.	Michael S Walley	Synthesis and Characterization of Pyridine and Pyrrole Containing Macromolecules.	Andreas Gebauer

KSC – Room 110: Chemistry – Analytical and Biochemistry

Time	Student Presenter(s)	Presentation Title	Faculty Mentor(s)
8:30 a.m.	Marina Abramchayeva Amanda Madison Zitadel Anne Perez	Effect of Single Base Bulges on Oxidative DNA-Protein Crosslinking	Eric D A Stemp
8:50 a.m.	Kathleen R Bishop	Growing Microalgae for Biofuel in Wastewater Media.	Iraj Nejad
9:10 a.m.	Karen A Antonio	The Analysis of False Positive Cyanide in Wastewater due to Chlorination and Preservation	Brett Stanley
9:30	Darin Khumsupan	Reconstitution of High Density Lipoprotein Containing a Polipoprotein E Receptor-Binding Domain May Serve as a Potential Nanovehicle for an Antioxidant	Vasanthi Narayanaswami

KSC – Room 130: Chemistry – Inorganic and Physical Chemistry

Time	Student Presenter(s)	Presentation Title	Faculty Mentor(s)
8:30 a.m.	Jasmine A Rios	Identification of Enantiomeric Interactions in Zeolite NaY by Solid State NMR, Thermogravimetric Analysis, and X-ray Diffraction	Jasmine A Rios
8:50 a.m.	Donatela E Bellone	Progress Towards the Syntheses of Tripodal Tris(diphenylphosphino) Co(I/II) Complexes for Functionalization of Si(111) Surfaces	Harry Gray
9:10 a.m.	Vivian Le	Layering Metalloporphyrins onto Titanium Dioxide via Axial Ligation in Dye-Sensitized Solar Cells	Hal Van Rsywyk
9:30 a.m.	Kyoung-Joo Park	Improvement of Tantalum Complex for Asymmetric Hydroamination Catalysis	Adam R Johnson
